Mail: **HipSaver Inc.**
7 Hubbard St.
Canton, MA 02021

Revolutionary MicroSpring™ Textile offers breathability, moisture transfer and anti-microbial protection not possible with gels, foams, fleece or polyfil. And is completely launderable!

Each layer of MicroSpring Textile has 4000 microfilaments per square inch to act as mini pressure relieving springs. Microfilaments flex to reduce pressure on bony prominences such as the heel, elbow, vertebra and trochanter. SkinTubes use two layers of MicroSpring Textile protect fragile skin from friction and pressure that cause tears, bruising and minor abrasions.

Order direct from our factory with your purchase order or credit card.
